

Emilia Matrix2

Bi Energy Select 70cm cooker

This is the second generation of the Emilia 70cm Matrix cooker.

Enhancements include:

Triple glass doors – reduces the outer surface temperature for a cooler door.

Stainless steel oven door handle – beautiful durable finish.

New burner spreaders – a new look that avoids spills that can mark the burners.

New knob and collar design – ergonomic and easy to use.

Bi Energyselct Oven – Roast a tender luscious leg of lamb in a gas oven. Bake

a perfect crisp pastry in an electric oven - but use only one cooker.

GAS AND ELECTRIC POWER IN THE ONE OVEN

Don't compromise on your cooking results with Emilia's new MATRIX2 70cm wide Bi Energyselct cooker. The new Emilia MATRIX2 Bi Energy Select cooker gives you the choice in baking with gas or electricity.

Fully featured with cast iron trivets, digital clock, automatic cooling fan, closed door grilling, auto ignition and now triple glass door, the new DI76GGESIB2 is perfectly specified for Australia kitchens.

Developed by Glem Gas in Australia and manufactured in the Glem Gas factory in Italy the DI76GGESIB2 is a compact cooker with large cooker features.

Compact and capable

This is the perfect size cooker to replace your old model without having to change your kitchen. The width of the Emilia 70cm cooker fits perfectly into the same space as many older style cookers. It is not too big, not too small and has a full size 5 burner gas cook top.

GAS BAKING

The Emilia 70cm Bi Energysselect oven has a fan assisted gas oven function.

Why Gas?

- Gas is an economical fuel – 50 percent lower in cost to electricity.
- Cooking with gas produces 50 percent less carbon emissions than cooking with an electric oven.
- Gas seals in moisture, reduces shrinkage and enhances flavour.
- Gas ovens are faster to heat up.

GAS IS GREAT IN A BLACK OUT

ELECTRIC BAKING (in the same oven)

The Emilia 70cm Bi Energysselect oven has a fan forced electric oven function.

Why electric?

- Electricity is a dry heat which is perfect for cakes, pastries and soufflés.
- If you are using LPG and run out of gas, electricity is a great back up.
