Under-cupboard rangehoods are sleek and unobtrusive, designed to be installed within the overhead cupboard above the cooktop. This setup allows for a seamless run of cabinetry, contributing to a clean, modern kitchen aesthetic. In cases where the overhead cupboards extend only about 30cm over the cooktop, it's recommended to use the rear burners during intense cooking. This positioning helps the under-cupboard rangehood operate more effectively in extracting smoke, steam, and cooking odours.

* allow 5mm clearance for installation

Please note:

Every effort has been made to ensure this information is correct. However, due to constant product improvement we reserve the right to make changes to products without prior notice.

Remote fan motor goes into ceiling space.

NOTE: Check that you home has a ceiling space above the kitchen to locate the motor.
