

induction

The most sophisticated electric cooking technology available. Induction is an exciting and rewarding method of cooking. Fast heating, highly efficient and excellent temperature control. Using a process of cooking using magnetism where the heat is transferred directly to the base of the pan. There is no conventional cooking element so the surface stays cooler. The sleek front stainless steel frame protects the front edge from accidental pan contact.

FEATURES

- European made ceramic glass top
- Touch controls
- Child lock – safety feature
- 9 Stage cooking settings
- Automatic pan sensor
- Automatic safety switch off
- Residual heat indicators
- Cooking Timer
